

# EX devices for Zone 1, 2, 21 and 22

**IEC**

Marking of electric devices is defined in IEC 60079-0 issued in 2004 for explosive gas atmospheres and in IEC 61241-0 issued in 2004 for areas with combustible dusts. In addition to the manufacturer's name or trade mark, type designation, serial number, and the test centre with certificate number, a special coding is required that describes the intended use of the device:

- > Ex-symbol
  - > Symbol of every type of protection that has been applied
- The associated electrical devices that are meant to be installed in the hazardous areas, have to be marked with the symbols for the type of protection in squared brackets, e.g. Ex d [ia] IIC T4.
- > Group II, IIA, IIB or IIC for potentially explosive gas atmospheres
  - > Temperature class for areas with potentially explosive gas atmospheres or max. surface temperature in °C for areas in which combustible dusts may be present.

Examples:

Ex d e IIC T4  
Ex d [ia] IIB T5  
Ex mbD T120°C

The types of protection have to clearly show which level they achieve. Some types of protection already contain the appropriate symbol (e.g. ia):

With others the letter a, b or c has to be added d -> db

Example:

Ex db eb IIC T4  
Ex db [ia] IIB T5

The second variant (called alternate marking in the standard) is preferentially used.

With this standard, groups for areas where potentially explosive dusts may be present have been introduced as well:

IIIA: combustible flyings  
IIIB: non-conductive dust

IIIC: conductive dust

Example for marking of dust:  
Ex tb IIIB T120°C

**Europe**

In Europe, in addition to the marking according to the standard the requirements pursuant to EC-Directive 94/9/EC (ATEX 95) have to be met as well:

- > Manufacturer's address
- > Symbol C € and the identification number of the notified body
- > and category 1, 2 or 3, as well as group II and the letter G (gases) or D (dust)

Example: Ex 2 II G

Previously, »Ex« was replaced by »EEx« in Europe, if the marking was done pursuant to the standard. Reference has thus been made to the European Standards (EN 50014 ff), which differed from the IEC-standards at that time. With the current editions of the standards this is no longer required, thus devices in Europe are only marked »Ex« now as well.

Up until now standards for non-electrical devices have only been developed by CEN in Europe. Such standards do not yet exist on an international level. Marking closely follows the marking of electrical devices.

Exceptions:

- > Ex is not stated, as with ATEX the Ex-sign already refers to explosion protection
- > Ignition protection level is not given. Alternative marking is not used either. The equipment protection level has to be defined with the category.

A summary of the topic marking of electrical and non-electrical devices can be found in the enclosure 7.7 and 7.8.

**Russia**

Marking of explosion-protected electrical equipment is done according to GOST R 51330.0-99 and according to the standards for the individual types of protection.

Marking of explosion protection contains:

- > the level of explosion protection
- > Ex-symbol
- > symbol of the types of protections that have been applied
- > equipment group (I, II or IIA, IIB, IIIC)
- > temperature class symbol X, when special conditions have to be observed for safe use or if the product is an Ex-component.

**North America**

In addition to such data as for example, manufacturer, type, serial number and electrical data, data concerning explosion protection must be included in the marking of the equipment. Specifications are given in NEC, CEC and the respective construction regulations of the test centres.

**Class I, II & III, Division 1 and 2**

Approved electrical equipment for Class I, Class II and Class III, Division 1 and Division 2 has to be marked with the following data:

1. Class(es), Division(s)  
(optional, except for Division 2)
2. Gas-/dust-group(s)
3. Operating temperature or temperature class  
(optional for T5 and T6)

Example: Class I Division 1 Groups C D T4

**Class I, Zone 0, 1 and 2**

For equipment for use in Class I, Zone 0, Zone 1 or Zone 2 a difference is made between »Division Equipment« and »Zone Equipment«.

**(1) Division Equipment**

Equipment approved for Class I, Division 1 and/or Class I, Division 2 may be marked with the following data:

1. Class I, Zone 1 or Class I, Zone 2
2. Gas group(s) IIA, IIB or IIC
3. Temperature class
4. Types of protection

Example: Class I Zone 1 d,e IIC T4

**(2) Zone Equipment**

Equipment complying with several types of protection pursuant to Article 505 of NEC and section 18 of CEC have to be marked as follows:

1. Class (optional in Canada)
2. Zone (optional in Canada)
3. Symbol AEx (USA) or Ex or EEx (Canada)
4. Symbol of the type(s) of protection that have been applied
5. Group of the electrical equipment II or gas group(s) IIA, IIB or IIC
6. Temperature class

Example: Class I Zone 0 AEx ia IIC T6

IP66 through bayonet locks, even while plugged in

Plug with IP66 in every position

100% backwards compatible with the CES series

85 °C	T6

explosive dust atmosphere: surface temperature

T ... °C (e.g.: T 80°C)

- Various versions:
- Extra-low voltage, 16A
- Large handle, can be locked in position 0 and 1
- Optimal contact by means of self-cleaning laminated contacts
- Low plugging and pulling forces through floating pins
- With motor switching capacity AC-3 acc. to IEC/EN 60947-3
- Optional auxiliary contacts for control and signalling purposes
- IP66 in any application position

Various versions

Foldable strain relief

- 8570/11 (16A) with terminals up to 6 mm<sup>2</sup> (previously 4 mm<sup>2</sup>)
  - can be used for larger cross sections
- Plug with foldable strain relief
  - quick and easy to install
- Plug with improved connection terminals
  - simple and reliable connection
- Pressure screw on plug with locking element
  - faster connection

Distributors can also be mounted according to your requirements.

- With flange sockets from 16A to 125A (25V to 690V)
- The distributors can be mounted with fuses of type 8561, circuit breakers of type 8562, FI/LS of type 8562, main switches and many other components.
- The distributors are manufactured according to customer specifications.

Cable roller

- Cable roller with 16A flange socket, corresponding plug and 30m cable (3x2.5mm<sup>2</sup>)
  - 16A, 230V, 3-pole
  - 16A, 400V, 5-pole

Other voltages on request

## EX DEVICES FOR ZONE 2 AND 22

■ for infrequent/brief hazardous explosive atmospheres

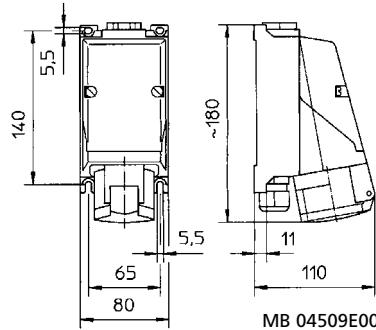

### Surface mounting socket outlet - extra-low voltage

- For use in Zone 2 and 22
- 16 A version for extra-low voltages up to 50 V
- Optimal contact by means of self-cleaning laminated contacts
- Protection type IP66 (IP55 while plugged in)
- Acc. to EX II 3 G EEx nAC IIC T6, T5
- Temp. -20...+40°C (-50...+55°C on request)
- Cable entry: 1 x M25 & 1 x sealing plug M25

# EX DEVICES FOR ZONE 1 AND 21

■ for occasional hazardous explosive atmospheres

## Plug

- For use in Zone 1 and 21
- Low plugging and pulling forces through floating pins
- Optional auxiliary contacts for control and signalling purposes
- IP66 in any application position
- Acc. to EX de IIC T6, with intrinsically safe auxiliary contacts Ex de(i)a) IIC T6 - gas explosion protection - 16A
- Acc. to EX tD A21 IP66 - dust explosion protection - 16A
- Acc. to EX de IIC T6 T5, with intrinsically safe auxiliary contacts Ex de(i)a) IIC T6 T5 - gas explosion protection - 32A
- Acc. to EX tD A21 IP66 - dust explosion protection - 32A
- For temp., see explosion protection details (-50°C on request - with internal lubrication with silicone grease)
- Cable diameter 8...20 mm (16A)/ 12...28 mm (32A)

## EX DEVICES

■ for Zone 1, 21

### Protective caps

- For plug

Bals no. 105534

for 16A plug, 3p (not for extra-low voltage)

Bals no.

**8352**

for 16A plug, 4p

**8353**

for 16A plug, 5p

**8354**

for 32A plug, 4p

**8355**

for 16A plug, 5p

**8356**

for 63A plug, 4p and 5p

**8357**

for 125A plug, 4p and 5p

**8358**

### Cable roller

- Zone 1, 2
- Protection type IP 54

Bals no. 8955

Bals no. 8956

Bals no.

**8955**

16A, 230V, 3p, 6h,

with 30m Proflex cable, 3x2.5mm<sup>2</sup>

**8956**

16A, 400V, 5p, 6h,

with 30m Proflex cable, 5x2.5mm<sup>2</sup>

### Socket distributor

- Zone 1, 2, 21, 22
- Protection type IP 54

Bals no.

**On request**
